

Working with ease...

Pallet Jacks

Our robust range of pallet jacks, come in many configurations & materials. All standard models have 685mm fork widths (B dimension) & 1220mm fork lengths (L dimension) except where nominated. The pumps have a galvanised housing & fitted with single valve cartridge & hard chromium plated piston for trouble free service. The wheels are single, polyurethane except the stainless & galvanised units, which are nylon.

Powered Pallet Truck

Compact yet gutsy 2200Kg battery electric pallet handlers with a powerful 3-phase AC technology drive motor. It has European made DANFOSS electronic controls for drive & lift. It is equipped with platform and arm protection making the operator feel more comfortable, and improves the working efficiency. A flip away platform allows the operator to ride with the load. Maximum gradient with/without load is 8/15%. The regenerative braking saves energy & smooth start up make this easy to operate and reliable at work. The battery is 24V/210Ah.
