

Working with ease...

Workstation Cranes & Jibs

GORBEL Workstation Bridge Cranes

Lifting and shifting from above is often the easiest way to solve handling problems. This range of overhead handling equipment provides the ideal combination of the most ergonomically effective, flexible & efficient workstation crane system.

The ergonomic, enclosed track, light, workstation bridge crane systems provide the handling equipment needed to increase productivity & get the job done.

They have the ability to span up to 10 metres and have lifting capacities from 125 - 2000kg allowing for easy product handling over a large area & creating a safe work cell for users.

Just add one of our Vaculex, vacuum tube lifters, a self-contained vacuum lifting device, an electric or air hoist, a balancer or one of our Intelligent Assist Devices (IAD'S) & the way is open for you to be..... working with ease

Available in:

Ceiling Mounted, Incorporating two parallel runways and a bridge suspended from the roof & providing full lifting coverage over a rectangular work area.

Freestanding, is the same as above except that the runways are supported on a freestanding structure.

Monorail Styles are a single rail supported either from the ceiling or a freestanding structure.

GORBEL Workstation Jibs

Enclosed track workstation jibs are ideal for supporting Vaculex vacuum tube lifters, electric & air hoists, Intelligent Assist Devices (IAD's), tool balancers, air balancers, and welding wire. They range in capacity from 50-500kg and can handle up to 200° rotation when wall or column mounted, and up to 360° rotation when freestanding, floor mounted or mobile.

Available in:

Freestanding, where it is supplied with a column to be fixed to the floor.

Wall Mounted, where it can be fixed to an existing column, or wall.

Mobile Mounted, where the jib & lifter can be relocated to a multitude of different work stations.

Ceiling mounted light crane makes loading easy over a CNC machine tool workstation.

Freestanding workstation crane making die changes easy & safe.

Articulated Jib Crane

The knuckle joint design allows the boom to turn back on itself and even service behind the support column. Available in wall, column or ceiling mount, where the work area is a premium.

This little task saver has low headroom & enables tools, vacuum tube lifters, balance air units, spring balancers etc. to be suspended and give absolute, infinite and effortless coverage over work stations & around obstructions.

Wall mounted	Column mounted	Total jib length
LCS8012	LWS8012	2500mm
LCS8015	LWS8015	3000mm
LCS8017	LWS8017	3500mm
LCS8020	LWS8020	4000mm

Specifications:

- Standard Jib lengths: 1250 + 1250mm, 1500 + 1500mm, 1750 + 1750mm, 2000 + 2000mm
- Height of Column Unit is ordered to suit
- Maximum SWL with hoist is 80kg

Freestanding jib with 360° slew, assists lifting at a machining station

Mobile, workstation jib with a Vaculex vacuum tube lifter, for lifting 25kg sacks. The jib can slew 360°
