INNOVATIVE PRODUCTS FOR THE LOADING DOCK INDUSTRY

U-SEAL

NON-COMPRESSION DOCK SEAL

Plant Engineering PRODUCT of the YEAR® Finalist 2013

U-Seal Non-Compression Dock Seal

While other dock seals work strictly on compression, the U-Seal's patented hollow foam core design reduces building load and wear and tear on the dock seal face. The unique "U" shape features an inner and outer foam finger that folds and conforms to various trailer types. The innovative design also minimizes the footprint within the impact zone of the forklift and pallet loading area when engaged in the trailer.

Features –

- Polyutherane foam
- Models with heavy duty vinyl
- Secondary heavy duty wear face for added durability in the contact zone
- Corners reinforced with triple layer heavy duty vinyl
- Replaceable wear surfaces
