

Scissor Lift Tables

SMARTLIFT – Scissor Lift Tables Economical & Ergonomic

Reduce the cost of back injuries in your plant and bring down the cost of your Workers Compensation Insurance - and bring up your bottom line.

- Increase production efficiency
- Enhance safety
- Reduce work-related fatigue
- Improve product quality
- Reduce physical and mental stress
- Improve employee morale
- Reduce direct costs for insurance, medical and sick leave
- Reduce indirect costs for replacing skilled workers, downtime and loss of production

SMARTLIFT with optional PALRING turntable.

SMARTLIFT with optional PALDISC low profile turntable.

SMARTLIFT pit mounted. With PALDISC fitted flush into the deck

you have the ultimate pallet truck access. Scissor deck has safety flaps fitted to protect operators toes.

SmartLift Control

This control is clever & functional & provides maximum safety. It has a number of extremely important features:

Diagnostic Function: In the unlikely event of a malfunction, LED indicator lights pinpoint the fault

Indexing Function: During loading the pallet can be programmed to drop a preset distance when another layer is loaded.

Safety Recoil: If the safety bar senses an obstruction it will instantly move away a short distance. Ultimate safety.

Safety Bar Alarm: Sounds when the table comes into contact with an object or person. This provides added safety by alerting others nearby that there is a potential problem.

Cycle Counter: Lets you know when a service is programmed. This improves the SMARTLIFT's working life & avoids breakdowns.

Smartlift Hydraulic Lift Tables with Safety Bar
