

IBC TILTING STAND MBTS10-W SPECIFICATIONS

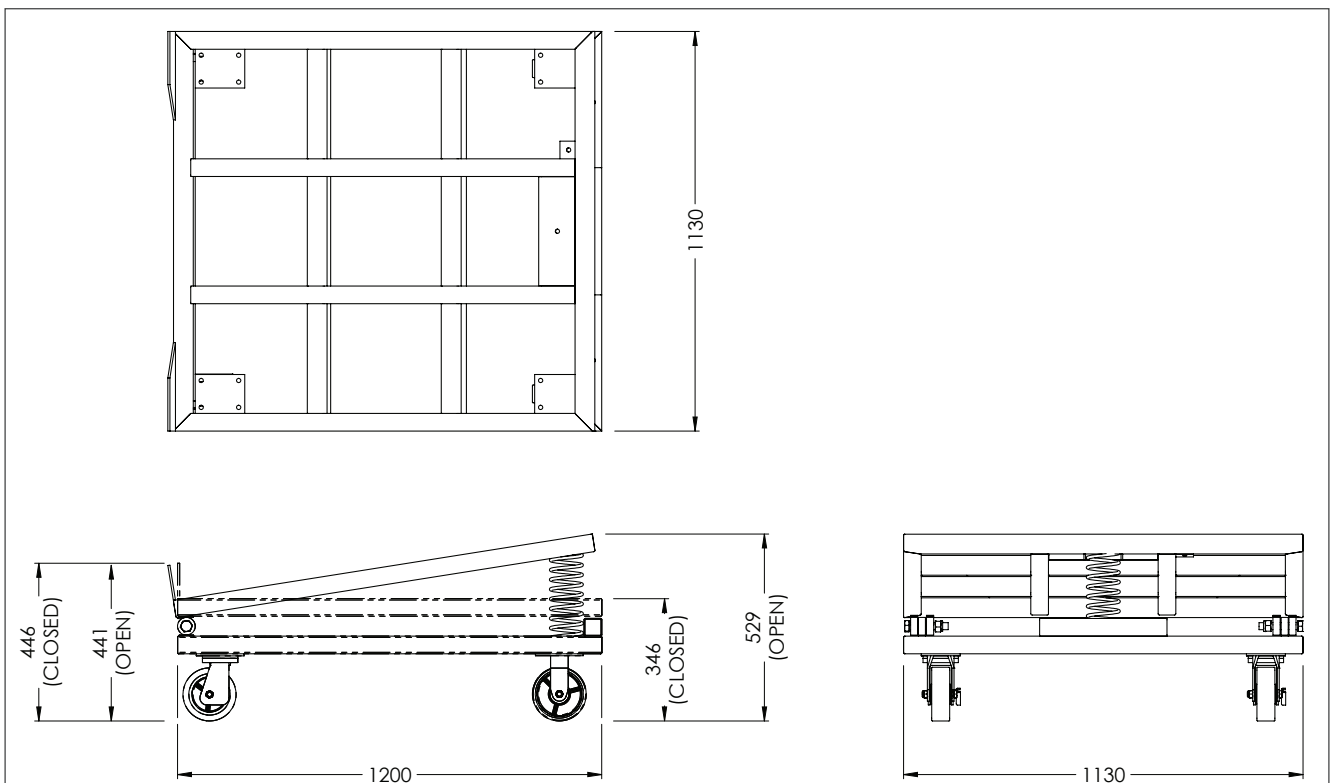

MBTS10-W IBC Bin Tilter with wheels is designed to effortlessly and without intervention allow full discharge of liquid from an intermediate bulk container (IBC). As the volume of liquid contained in the IBC reduces the spring mechanism will raise the rear of the container to an incline of up to 10 degrees. Fitment of one spring is suitable for most applications. For heavier metal construction IBC's, the unit can be easily adjusted to suit the load weight by simply adding additional springs.

Features:

- 10° tilt allows decanting directly from IBC
- Supplied with 3 springs (1-3 used depending on load weight)
- Easy access for a hose coupling to be attached to drain valve
- Wheels fitted for manually pushing IBC around the workplace
- Available in model with removable fork pockets (MBTS10) allowing IBC to be transported around the site by forklift
- Zinc finish

Working Load Limit	2000kg
Wheels	150mm DIA PU/CI (2 fixed, 2 swivel) with brakes
Unit Weight	78kg
