

MINI-MIGHTER AIR HOIST LTMM140 SPECIFICATIONS

An industrial wire rope lifting device with Emergency Stop. 140 kg capacity with 3 metre lifting height. Made in Japan, this is an extremely compact and lightweight lifting device that features an automatic failsafe brake for the highest safety and an emergency stop function.

The single-hand controls allows fast, safe and accurate control of the speed, while also providing the operator with excellent control when positioning the load. This device is well suited to repetitive lifting applications and environments where electrical supply is a concern.
