

# MEGABIN SPECIFICATIONS

**For more than 40 years, when it comes to the best end-to-end solution for your fresh produce, our Megabin has been the pick of the bunch.**

## **A new generation of premium Megabins**

But we're about to add a whole new chapter to the Megabin story. Welcome to our exciting new, lowered height Megabin and Folding Bin ranges.

The release of the new generation Megabin 440 and 580, designed with lowered bin heights, now offers superior protection for your delicate fruit produce.

## **The Megabin: The original and the best**

Made by leaders of the Circular Economy, the original Megabin was specifically created to suit the needs of Australian farmers, providing premium storage and protection for your fresh produce.

Today the Megabin 780 continues to be the industry standard for innovative bin design and high quality construction from 100% recyclable materials.

# Folding MegaBin. A new story unfolds.

An innovative new initiative for the next generation of Megabins, is our space saving folding bin, cleverly designed for the walls to fold down and collapse on each other.

You have the choice of several design options, including full or half vented sides, solid base, and single or multiple drop doors to ensure you can load or unload the bin safely.

Built to offer a load capacity over 550kgs, and designed to reduce damage to your produce and improve sustainability, the fully recyclable Folding Bins, a smart choice.

Engineered and Made in Australia, the Megabin range has been developed in collaboration with industry partners and built on decades of experience.

# The Megabin Difference

**Lightweight and safe to handle**  
Efficient to move and transport. Unique interlocking foot design makes bin easy to align, stack, and store.

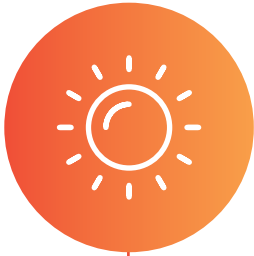

**Rounded corners and smooth interior surfaces**  
Means less bruises, scuffs, abrasions, and cuts to produce.

**Traceability and Bin Security**  
Identification methods include Barcodes, RFID, Custom Branding and Sequential Numbering.

**Hygienic & Easy to Clean**  
Smooth, nonporous surfaces are easy to sanitise and won't trap debris, breed bacteria, or absorb chemicals like timber bins.

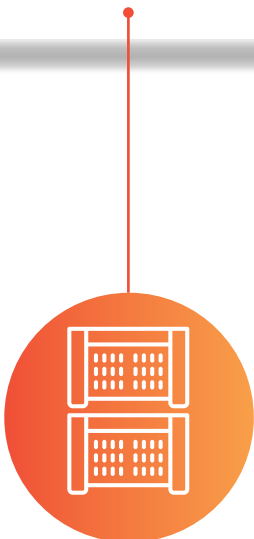

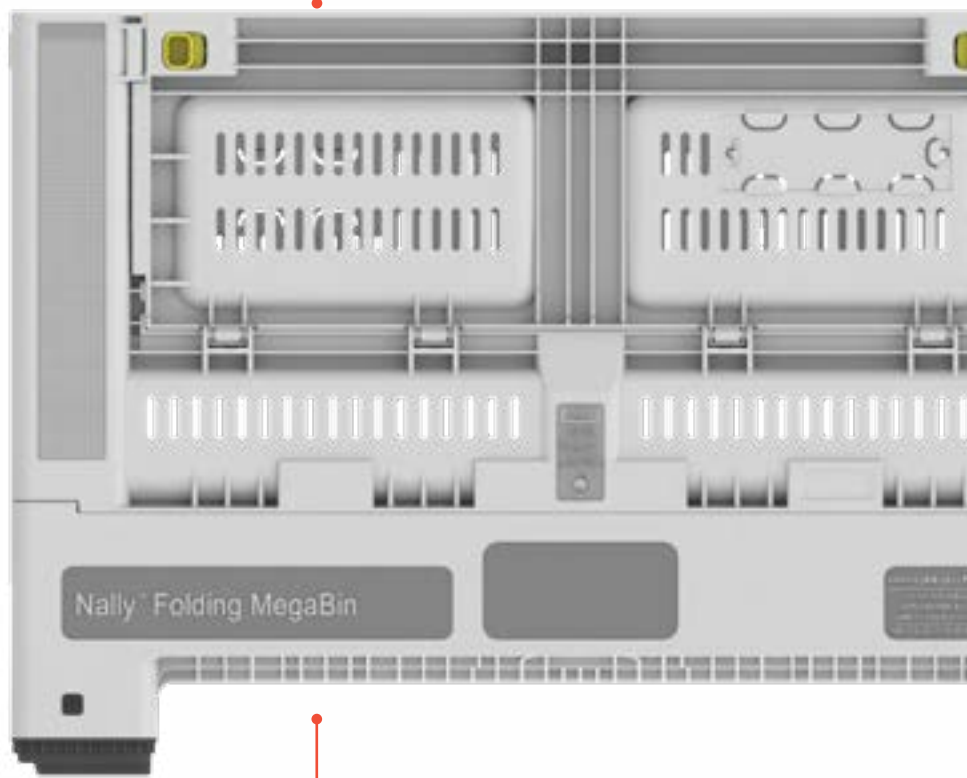

**UV Stabilised**

UV Stabilised and robust to withstand extreme Australian conditions with a proven long life expectancy.

**Multiple ventilation slots for superior air and water flow**

Helps cool down produce faster and extend its shelf life. Available in 6mm and 10mm profiles.

**100% Stack Compatibility**

Designed to be compatible and interchangeable with the existing Megabin Range.

**Automation**

Compatible with the Standard Australian Foot Print, Bin Tippers, Washing Equipment, Farm Machinery and Automation.
