

CONCRETE WASHOUT BINS MCPC SPECIFICATIONS

The MCPC Concrete Washout Bins are a safe and effective on-site solution for handling line cleans of boom and concrete pumps.

Designed for optimal safety, its heavy-duty construction with waste intake pipe and vent removes the risk of injury caused by blowouts during line cleaning.

The containment bin ensures EPA compliance on-site by preventing pollution from run off and cleanly stores cement waste.

Secured to the bin by safety chains in 4 points, the lid includes a 125 mm NB waste intake pipe for quick and safe connection to pipeline and is fitted with crane lugs and fork pockets for easy fit up and removal. Optional reducers available to suit 100/80/50 mm pipelines.

Bin is fitted with crane lugs for both lifting and up-ending load and 4-way entry fork pockets.

Disposable concrete washout plastic liners (MCPC17DPL or MCPC23DPL) are available to make collection and disposal of waste easy.

Enamel paint finish lid and galvanised finish bin.

Type MCPC23

Type MCPC17 with Plastic Liner

Model	WLL (kg)	Capacity (cm ³)	O/A Dimensions (mm)	Pocket Size / Centres (mm)	Unit Weight (kg)
MCPC11	2000	0.85	1290 x 1180 x 1350	150 x 90 / 70	242
MCPC17	2000	1.3	1830 x 1185 x 1285	150 x 90 / 70	380
MCPC23	2000	2.5	2330 x 1545 x 1320	150 x 90 / 70	600
MCPC23H	5000	2.4	2330 x 1545 x 1325	150 x 90 / 70	850
