

# IBC SPILL BINS

## DSLIBC1250 SPECIFICATIONS

The type DSLIBC1250 Spill Bin provides complete protection against costly and environmentally damaging chemical spills from leaking intermediate bulk containers (IBC).

Designed to suit most IBC's available on the market, this unit has close spacing support bars and comes in a long life Zinc plated finish.

To empty the containment area, a single Drain Plug has been provided at the front of the Bin.

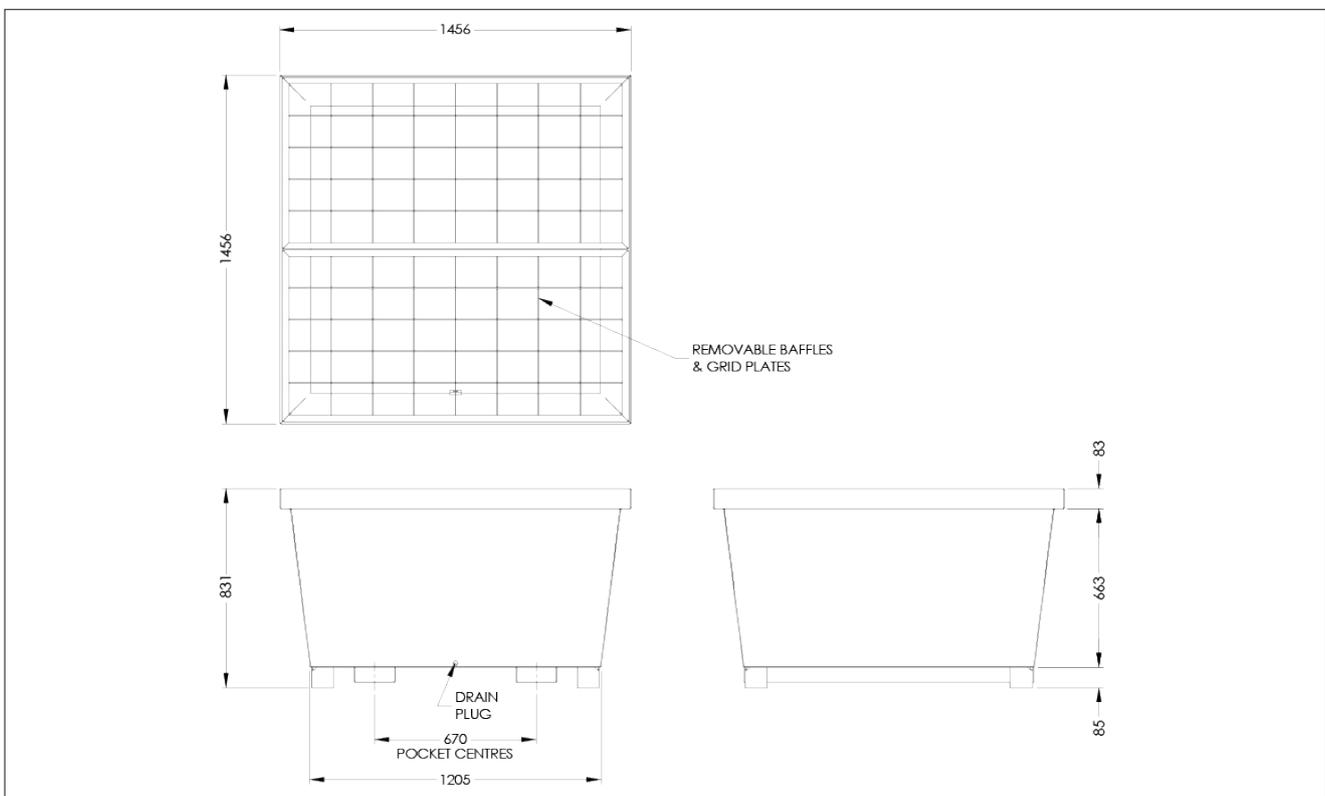

The Baffle and Grid plate assemblies are removable allowing Bins to be stacked for storage/transport.

Fork Pockets fitted for transport.

All type DSLIBC1250 Spill Bins have a spill capacity of at least 125% of the IBC holding capacity in accordance with Australian Standards, being classified as "portable" units.
