Intelligent lifting device which meets the highest standards of ergonomics, working environment, safety and efficiency.

Easy to use, thanks to outstanding responsiveness, regardless of load weight.

Exceptional safety is achieved using our intelligent control systems.

The best auto balancing available, regardless of load weight.

High cost efficiency through low power consumption, high reliability and long durability.
TECHNICAL DATA - QUICK-LIFT RAIL QLR 125i

Lifting capacity: Max 125 kg

Lift motor: Stepless servo-controlled asynchronous motor

Weight: 28 kg

Manoeuvring: Manoeuvring is done by using a patented manoeuvring handle or balancing mode. Both options sense the operator’s hand/arm movement and give a very exact and smooth speed control. Only a force equivalent to 20 gram is needed to engage the up/down motion. When the operator let go of the handle or object, the up/down motion is immediately stopped.

Power supply: 230V, 50-60 Hz, 1-phase with ground protection, 10A

Stroke length: 2.7 meter

Suspension: The QLR 125i can be mounted in the most types of rail systems. Existing rail systems can often be used.

Gripping device: Grippers are designed to fit customer’s need. Intelligent I/O signals are available for optimum functionality. Easy accessible USB communication as standard.
