Intelligent lifting device which meets the highest standards of ergonomics, working environment, safety and efficiency.

Unique integrated mechanical, electrical, pneumatic swivel enables continuous rotation of gripper.

Easy to use, thanks to outstanding responsiveness, regardless of load weight.

Exceptional safety is achieved using our intelligent control systems.

High cost efficiency through low power consumption, high reliability and long durability.
Quick-Lift Rail QLR 200i

TECHNICAL DATA

Lifting capacity  Max 200 kg
Lift motor        Stepless servo-controlled asynchronous motor
Weight            43 kg
Manoeuvring      Maneuvering is done by using a patented maneuvering handle or balancing mode. Both options sense the operator's hand/arm movement and give a very exact and smooth speed control. Only a force equivalent to 20 gram is needed to engage the up/down motion. When the operator let go of the handle or object, the up/down motion is immediately stopped.
Power supply      230V, 50-60 Hz, 1-phase with ground protection, 10A
Stroke length     2.7 meter
Suspension        The QLR 200i can be mounted in the most common rail systems. Existing rail systems can often be used.
Gripping device   Grippers are designed to fit customer's need. Intelligent I/O signals are available for optimum functionality.
