## MAGIC-EYE

Infra-red load height sensor enables ergonomic pallet stacking

## 24V / 200Ah

Standard battery specifications

The Quikstak SP15 Series is a range of heavy-duty self-drive pallet stackers with a capacity of 1500kg and lift heights from 1.6 metres to as high as 5.6 metres. Optionally equipped with 'magic-eye' automatic height adjustment, the SP15 is suitable for warehousing, dispatch, manufacturing, stacking and general materials handling operations, in any industry.

The SP15 is fitted with a new self-drive unit, with a brushless electric motor and intelligent regenerative braking system. Combined with a bank of lead-acid batteries delivering 200Ah, this permits all-day use in even the most demanding of environments.

Both the straddle legs and forged forks on the SP15 are width-adjustable, allowing the stacker to lift all common types of pallet, as well as traverse warehouse aisles as narrow as 1200mm. The tiller includes infinitely-variable drive controls, ergonomic raise/lower buttons and a safety sounder, all accessible with both hands.

Like all Quikstak S-Series products, the SP15 complies with a range of international quality and safety standards, and is manufactured in an ISO9000 certified plant. It is the only heavy-duty, high-reach pallet stacker available which has been specifically optimised for Australasian conditions – combining technical innovation trusted heritage of reliability.
