

RIGGING STORAGE RACK MCNG100 SPECIFICATIONS

The MCNG100 Rigging Storage Rack is the ideal solution to manage and store rigging equipment, such as chains, slings, shackles, hooks and clamps, when not in use. This storage rack is designed to help prevent damage and other hazards that may compromise the integrity of your lifting equipment.

With a strong 'A' frame construction for stability, this unit is fitted with 14 hooks to store and organise your equipment. The solid base keeps rigging equipment off the floor and from potential damage. Fork pockets and crane lugs are fitted for transport by forklift or crane. For complete flexibility when moving around the workplace, removable wheels are also fitted as standard.
