

SAFETY STRAP™

Patent Pending

SPECIFICATIONS AND DATA SHEET

Retractable Dock Door Strap

Keep Your Dock Workers Safe

- Designed for cross docks and facilities that leave their dock doors open
- Designed with superior strength that exceeds OSHA standards
- High visibility dock barrier
- Helps prevent dock workers from falling off a loading dock
- Strap is retractable to keep clear of door opening when not in use

Can be incorporated with Dock Communication Systems, or used as a stand alone unit

The Smart Choice for facilities that keep their loading dock areas open

Optional proximity sensor detects that the strap is engaged when used with Safety Signal™ or Smart Chock™

Incorporate the Safety Strap with Smart Chockor Safety Signal to help reduce the potential for dock accidents and improve production!

Safety Strap and Safety Signal communication system setup

The Safety Strap with optional proximity sensor can be used with Safety Signal at facilities that typically keep their doors open.

Strap Engaged:

Inside Box Red
Outside Box Green
Versa Light* OFF
Auxiliary Output OFF

Strap Disengaged:

Inside Box Green
Outside box Red
Versa Light* ON
Auxiliary Output ON

*Versa Light optional

Safety Strap and Smart Chock communication system setup

When supplied with optional proximity sensor, Safety Strap can be integrated with Smart Chock. The Safety Strap replaces the function of the dock door opening and closing when the facility operates with the loading dock doors open.
