

# SIDE SHIFT DRUM DE-PALLETISER DTP04 SPECIFICATIONS

The Side Shift De-Palletiser's unique versatility means no more moving drums by hand! It is the only unit in the world that can handle drums on and off pallets or bunds from any position.

## Safe

The operator only requires 12 kg of force on the handle to lift 300 kg.

## Efficient

Two speed hydraulics ensures de-palletising is done quickly.

## Versatile

Access is from the front so all pallets and bunds can be stored against a wall.
