

## SLEEVE-LOK REMOVABLE BOLLARDS

Below Ground and Surface Mounted

### Features:

- Available in three diameters with a choice of in-ground sleeves (sold separately).
- Thousands installed in a wide variety of indoor and outdoor applications over a 14 year period.
- Widely used for managing vehicle access in restricted areas. These include industrial sites, parks and gardens and numerous other public space environments.
- Sleeve-Loks use a simple padlock design whereby the cap on the in-ground sleeve is secured to a high strength steel shackle welded onto the bollard.
- Sleeve-Lok removable bollards come in two styles. Freestanding and roller door models, for the protection of factory roller shutter doors.
- Cast aluminium caps and handles finished in a silver grey metallic powder coat.
- Galvanised and powder coated or galvanised only.
- Stainless steel models are made from marine grade 316 stainless steel with matching flat caps or aluminium caps and handles.
- Optional chain ring kits available.

Wall mount bollard holder.

Surface mount bollard holder.

Padlock (sold separately).

Roller door brackets.
