

# STOCKMASTER MEZZALAD MEZZANINE ACCESS LADDER

## StockMaster Mezzalad ladders utilise the space you have paid for!

StockMaster Mezzalad features a space saving mechanism which allows it to be stored flat against the wall when not in use, and is brought to the use position with a simple lift and pull action.

The 600 mm step width provides comfortable access, and two hand rails are included for safe and easy climbing. The hand rails extend 900 mm beyond the upper floor, enabling safe step through access to the upper floor while maintaining a hand hold.

A Safety Gate is provided at the upper floor level to maintain the integrity of the perimeter railing. All risks associated with operating the gate while standing on the ladder are eliminated as the gate may be opened or closed with the operator standing fully on the upper floor.

The ladder is fastened at the upper floor level. Installation is simple with two universal brackets allowing fastening to be made either to the upper floor or wall and the ladder may be secured with bolts or screws. The ladder may be used at multiple locations by use of additional bracket sets. Mezzalad is produced in two separate series to suit all floor heights between 1.31 to 4.28 meters.

The VH series is available in four sizes and suits the most popular floor heights between 2.33 to 3.225 meters. The CM series (manufactured to order) is available in eleven sizes to suit the remaining floor heights in the range.

Please Note: CM series is available in Asia Pacific only.

Mezzalad is designed to comply with relative elements of Australian Standard AS 1892:1.1996 for portable metal ladders.
